county.council@mauicounty.us

Re: Certain Correspondence

Dear Sir or Madam:

On behalf of the public policy group Energy Policy Advocates (EPA), and pursuant to the Hawaii Revised Statutes § 92F-1, *et seq.*, please provide copies of the following records:

1. **Any correspondence that was sent to or from (including copying, whether cc: or bcc:) Maui City Council's Kelly Takaya King, that includes @climateintegrity.org, anywhere, whether in the to/from/cc/bcc fields, the body of an email or email 'thread', or in any attachments, at any time from January 1, 2021 through the date you process this request, inclusive.**

We note the Corporation Counsel's "no records" response and recommendation that the alternate custodian would be Council Member King, as set forth in the Notice to Requester from Daniel J. Kunkel, Maui Deputy Corporation Counsel, also attached to this request.

We request entire "threads" of which any responsive electronic correspondence is a part, regardless whether any portion falls outside of the above time parameter.

To narrow this request, please consider all attachments that are published or docketed materials, including pleadings, regulatory comments, ECF notices, news articles, and/or newsletters, as non-responsive, i.e., you need only produce the email transmitting such records.

We request that the County conduct a non-conflicted search, as necessary to fulfill its obligation to conduct a reasonable search. A non-conflicted and therefore proper processing of this request does not merely entail asking the official named in the request if they possess responsive information. We request that the County assert in its response whether that response is based on a search conducted by the official identified in the request, or by another party.

We understand that in some instances a public body may charge a fee for the cost of the search, examination, review, copying, separation of confidential from nonconfidential information, and mailing costs. If your Office expects to seek a charge associated with the searching, copying or production of these records, please provide an estimate of anticipated costs.

As noted earlier in this request, EPA is a non-profit public policy organization dedicated to informing the public of developments in the area of energy and environmental issues and relationships between governmental and non-governmental entities as they relate to those issues. EPA's ability to obtain fee waivers is essential to this work. EPA intends to use any responsive information to continue its work highlighting the nexus between interested non-governmental entities and government agency decision-making. The public is both interested in and entitled to know how regulatory, policy and enforcement decisions are reached. EPA ensures the public is made aware of its work and findings. The public information obtained by EPA have been relied

upon by established media outlets, including the Washington Times and Wall Street Journal editorial page.¹

Energy Policy Advocates requests records on your system, e.g., its backend logs, and does not seek only those records which survive on an employee's own machine or account. We do not demand your office produce requested information in any particular form, instead **we request records in their native form**, with specific reference to the U.S. Securities and Exchange Commission Data Delivery Standards.² The covered information we seek is electronic information, this includes electronic *records*, and other public *information*.

To quote the SEC Data Delivery Standards, "Electronic files must be produced in their native format, i.e. the format in which they are ordinarily used and maintained during the normal course of business. For example, an MS Excel file must be produced as an MS Excel file rather than an image of a spreadsheet. (*Note: An Adobe PDF file is not considered a native file unless the document was initially created as a PDF.*)" (emphases in original).

In many native-format productions, certain public information remains contained in the record (e.g., metadata). Under the same standards, to ensure production of all information

¹ See, e.g., The Editorial Board, "State AGs' Climate Cover-Up" Wall Street Journal, June 7, 2019, <https://www.wsj.com/articles/state-ags-climate-cover-up-11559945410>. requested, if your production will be de-duplicated it is vital that you 1) preserve any unique metadata associated with the duplicate files, for example, custodian name, and, 2) make that unique metadata part of your production.

Native file productions may be produced without load files. However, native file productions must maintain the integrity of the original meta data, and must be produced as they are maintained in the normal course of business and organized by custodian-named file folders. A separate folder should be provided for each custodian.

In the event that necessity requires your office to produce a PDF file, due to your normal program for redacting certain information and such that native files cannot be produced as they are maintained in the normal course of business, in order to provide all requested information each PDF file should be produced in separate folders named by the custodian, *and* accompanied by a load file to ensure the requested information appropriate for that discrete record is associated with that record. The required fields and format of the data to be provided within the load file can be found in Addendum A of the above-cited SEC Data Standards. All produced PDFs must be text searchable.

We look forward to your response. If you have any questions, do not hesitate to contact me by email at Schilling@allhookedup.com.

Sincerely,

A handwritten signature in black ink, appearing to read 'Rob Schilling', with a long horizontal flourish extending to the right.
